SUMMARY

Computer Science student specializing in **AI Automation**, **Machine Learning**, and **Data Science**. Skilled in GoHighLevel, Zapier, n8n, Make, C++, Java, C#, and Python. Experienced in building **AI-powered automation workflows**, API integrations, and efficient business solutions.

EDUCATION

American International University-Bangladesh (AIUB), Dhaka

B.Sc. in Computer Science and Engineering

Laxmipur Govt. College, Noakhali

A.K.G. Sayedul Huque Adarsha High School, Noakhali

CGPA: 3.63

HSC: GPA 4.75

SSC: GPA 4.61

TECHNICAL SKILLS

Languages: Python, C, C++, C#, Java, JavaScript, PHP, SQL, R

Frameworks: ASP.NET, FastAPI, TensorFlow, Scikit-learn

Tools: GoHighLevel, Zapier, n8n, Make, NumPy, and Pandas

Domains: AI Automation, Machine Learning, Data Science,

KEY PROJECTS

TravelBro – Travel Agency System — C#

- Secure CRUD-based travel management system with admin panel and reporting.

Event Booking System — Web Development

- Dynamic seat selection with real-time availability and responsive UI.

Online Shopping System — Java, JDBC

- Product browsing, secure checkout, and database-driven inventory management.

Arcine – Arcade Game — OpenGL, C++

- 2D arcade game with collision detection, controls, and scoring system.

FoodPanda Mobile App Design — UI/UX Design

- Designed a modern and user-friendly mobile app interface for a food delivery platform.

AI Automation Integration — GoHighLevel, n8n, Zapier, Make

- Built end-to-end automation workflows using GoHighLevel, n8n, Zapier, and Make, integrating APIs, webhooks, AI tools, and third-party applications to automate business processes, streamline lead management, and improve operational efficiency.

RESEARCH

Web-Based Crop Prediction — Machine Learning

- ML-based web system for agricultural data analysis and crop-type forecasting.

NPC Behavior in Gameplay — Machine Learning

- Enhanced non-player character behavior for realistic and immersive gameplay.

ACHIEVEMENTS

Finalist, NWU Project Showcasing — NWU CS Fest 2025
