SUMMARY

Computer Science student interested in **Machine Learning**, **Data Science**, and **AI Automation**. Skilled in C++, Java, C#, Python, Zapier, n8n, LangChain, and GoHighLevel. Passionate about building secure, efficient, and user-friendly AI-driven applications.

EDUCATION

American International University-Bangladesh (AIUB), Dhaka

B.Sc. in Computer Science and Engineering

Laxmipur Govt. College, Noakhali

A.K.G. Sayedul Huque Adarsha High School, Noakhali

CGPA: 3.63

HSC: GPA 4.75

SSC: GPA 4.61

TECHNICAL SKILLS

Languages: Python, C, C++, C#, Java, JavaScript, PHP, SQL, R

Frameworks: ASP.NET, FastAPI, TensorFlow, Scikit-learn

Tools: NumPy, Pandas, Zapier, n8n, Make and GoHighLevel

Domains: AI Automation, Machine Learning, Data Science,

KEY PROJECTS

TravelBro – Travel Agency System — C#

- Secure CRUD-based travel management system with admin panel and reporting.

Event Booking System — Web Development

- Dynamic seat selection with real-time availability and responsive UI.

Online Shopping System — Java, JDBC

- Product browsing, secure checkout, and database-driven inventory management.

Arcine – Arcade Game — OpenGL, C++

- 2D arcade game with collision detection, controls, and scoring system.

FoodPanda Mobile App Design — UI/UX Design

- Designed a modern and user-friendly mobile app interface for a food delivery platform.

AI Automation Learning Roadmap — n8n, Airtable

- Built end-to-end automation workflows using n8n and Airtable, integrating APIs and AI tools like OpenAI/LangChain to streamline processes and improve efficiency.

RESEARCH

Web-Based Crop Prediction — Machine Learning

- ML-based web system for agricultural data analysis and crop-type forecasting.

NPC Behavior in Gameplay — Machine Learning

- Enhanced non-player character behavior for realistic and immersive gameplay.

ACHIEVEMENTS

Finalist, NWU Project Showcasing — NWU CS Fest 2025
